DETAILED ACTION

Information Disclosure Statement

The IDSes filed 5/06, 10/07 and 12/08 have all been considered and placed of record. The initialed copies are attached herewith.

Response to Amendment

The amendment filed 6/4/07 is not in proper form. All subject matter being added to original patent claims must be underlined. All subject matter being deleted to original patent claims must be placed between brackets (not strike-through). Moreover, the underlines and brackets should be kept throughout subsequent amendments. 37 CFR 1.173(b)(2) and (d). See also MPEP 1455.

Final claims not being considered should be labeled as 'cancel' instead of 'withdrawn.'

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir.

Art Unit: 2838

1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10, 101, 102, 104, 105, 107-110, 112, 118, 119, 121-123, 125-127, 129, 148-172, 129, 148-172, 174-176, 178-186, 188-191, 193-196, 198 and 199 are provisionally rejected on the ground of nonstatutory double patenting over claims of copending Application Nos. 10/383,068 and 11/757,991. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter because they are 'straight' continuations. The entire specification including the drawings is identical. The claims are variations of each others.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
